

MANAGEMENT OF

'DIABETES MELLITUS' NEEDS NOT ONLY
TO ACHIEVE BLOOD GLUCOSE TARGET BUT ALSO TO

REDUCE RISK OF COMPLICATIONS

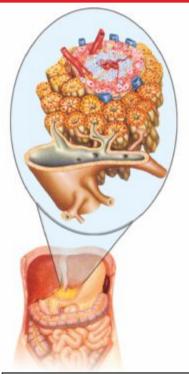

CLINICALLY EVALUATED AT AIIMS, NEW DELHI

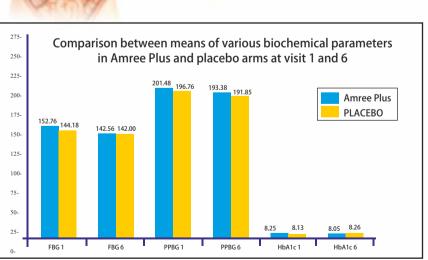

For its efficacy, Non-toxicity and safety profile in type 2 Diabetes Mellitus

AMREE PLUS with PLUS benefits of System Toner

Established as Comprehensive Anti-Hyperglycemic + System Toner

A double blind placebo controlled study on "Amree Plus" for its efficacy & non-toxicity in Type-II Diabetes Mellitus patients was conducted at AIIMS, accepted & presented at APICON DIAMOND, MUMBAI.

- Prominent anti-hyperglycemic effect.
- Effect on fasting blood glucose was more than post prandial blood glucose.
- Significant lowering effect on glycosylated hemoglobin.
- Improvement in Renal and Liver function tests.

AMREE PLUS with PLUS benefits of System Toner

Mechanism of Action -for controlling high blood glucose level

EFFECT OF A+ ON PANCREAS

Potentiates
glucose mediated
insulin secretion

Nigella sativa (Kalaunji)

Pterocarpus marsupium (Vijaysaar)

Acts as Potent DPP-4 inhibitor

Eugenia jambolana (Jamun)

Enhances the body's own ability to release insulin & regulate blood glucose level

EFFECT OF A+ ON LIVER

✓ Decreases hepatic glucose over-production

Eclipta alba (Bhringraj)

Decreases activities of Glucose-6-phosphatase & Fructose 1,6 bisphosphatase, increases activity of Liver Hexokinase, thereby inhibiting gluconeogenesis

Effectively controls BLOOD GLUCOSE level

Maintains NORMAL BLOOD GLUCOSE

EFFECT OF A+ ON MUSCLE & FAT

Improves Lipoprotein lipase action

Coccinia indica (Kundru)

Increases insulin sensitivity

Momordica charantia (Karela)

Decreases insulin resistance, making the cells more sensitive to effects of insulin & results in decreased blood sugar levels.

EFFECT OF A+ ON GUT

Acts as Alpha-glucosidase inhibitor

Delays glucose absorption

Gymnema sylvestre (Gudmar)

Provides anti-sweet principles, Gymnemic acids, Gurmarin which suppress taste responses to sugar. Curtails elevation of plasma glucose levels by filling the receptor location in absoptive external layers of the intestine.

For Safe, steady and systemic glycemic control

AMREE PLUS with PLUS benefits of System Toner

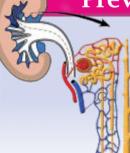

Prevents Diabetic Complications-Nourishes & Rejuvenates vital organs

Prevents Retinopathy

- -Modulates polvol pathway
- -Inhibits aldose reductase
- -Decreases accumulation of sorbitol, helps prevent lens opacities and retinal damage due to flavonoids like **Butin**, **Quercetin**

Prevents Nephropathy

- -Improves kidney functional capacity
- -Stimulates regeneration
- -Protect nephrons due to
- Saponins in Punernava

Prevents Neuropathy

- -Rejuvenates, Protects & Strengthens neurons
- Reduces diabetic oxidative stress
- -Regulates Nitric Oxide Production by Ashwagandha

Acts as Cardioprotective

- -Acts as cardiovascular protective by Omega-3&6
- -Strengthens walls of blood vessels by Tannins
- -Helps lower plasma lipids levels
- -Almond oil fights in diabetes related heart diseases
- -Octacosanol from Wheat germ oil plays a key role in energy production in cells

Improves Body defense system

Improves local & cellular immunity,
helps in Diabetic foot ulcer by Giloe
Provides Anti-oxidant defence- Lycopene
Supplements Lutein from spinachprevents effect of high glucose level on immune
system cells

Supplements Micro-nutrients

Phosphate-makes more oxygen available to the tissues by Vijaysaar Chromium & Copper-inhibits accumulation of Sorbitol by Methi

Manganese & Magnesium improve production of insulin by Jamun

Zinc improves Anti-oxidant enzymes in RBC's by **Pumpkin** seeds

For Safe, Steady and Systemic Results...

Established Anti-Hyperglycemic + System Toner

EXCLUSIVE BENEFITS:

- FREE FROM THE RISK OF HYPOGLYCEMIA
- CHECKS OVER FATIGUE, EXCESSIVE THIRST &URINATION
- HELPS REGULATE GLUCOSE AND LIPID METABOLISM
- IMPROVES IMMUNITY AND ANTI-OXIDANT DEFENSE SYSTEM
- PREVENTS DIABETIC COMPLICATIONS
- ACTS AS CARDIO-PROTECTIVE
- A SAFE CO-PRESCRIPTION WITH OHG's

INDICATIONS:

- Type II Diabetes Mellitus
- Impaired Glucose Tolerance
- As adjunct to OHG's & Insulin
- In PCOS with Amycordial

DOSAGE: (Should be taken 20-30 minutes before meals)

in Mild conditions

Granules: 1/2 teaspoonful twice a day

Tablets: 1 Tablet twice a day

or as directed by the Physician for varying severity conditions.

Liquid: 1 teaspoonful twice a day
